URBAN ABSTRACT ARTIST

Artist Statement

I believe in creating art that sparks people's emotions to start a conversation or inspires them to be a better version of themselves. Is my impact on this Earth.

Abstract painting has been the best way of expressing the messages that come through me to share with the world. Using a lot of texture and colors, to make masterpieces with impact. Boldness. They stand out. They have a unique style. I become a vessel for movement.

A legacy to leave behind to inspire generations to come.

As artists we give light to the darkness to give it new life.

Most of my paintings are a mixture of fantasy and reality.

Colors, and texture, make my reality a complete one.

About

I am a mixed media artist. My main mediums are acrylics, watercolors, paper, canvas, and photography. I am creative. I was born and raised in Buenos Aires, Argentina. A magical city full of culture and art. I lived in a few places along the way

before finding a wonderful place in the mountains, Asheville, where I decided to make my home. I do everything creative. I believe that being creative is a way of life. I am lucky enough to do what I love every day of my life.

My style is very urban and disruptive, full of color and boldness. In every medium.

I have always loved art. One of my most dear memories is when I was about 7 years old at art class at school in Buenos Aires. I remember in detail all the art supplies, the kiln for ceramics, the tables, the smells. Art fires up my soul, and I feel as a messenger and a message is just coming through me.
